Resume Score : 66 / 100

Missing skills and why they matter:

react - It is widely used to build modern front-end applications.

bootstrap - It helps in building responsive layouts faster.

api - It is required to integrate frontend and backend services.

Suggestions to improve:

Learn react and build at least one project using react to strengthen your profile.

Learn bootstrap and build at least one project using bootstrap to strengthen your profile.

Learn api and build at least one project using api to strengthen your profile.
